LAMPORT

LAMPORT Alarm Portal
– The Security Solution of the Future

Gain full control over your security systems with a modern, cloud-based platform. With LAMPORT Alarm Portal, you can easily manage, monitor, and administer all your alarm installations in one place. Our platform is designed to meet the specific needs of both public sector and private companies.

What makes the LAMPORT Alarm Portal unique?

→ **Centralized alarm management:** Collect all your alarm installations in a simple, user-friendly interface. Choose who should receive alarm notifications, how they are delivered (SMS, email, or push notification), and gain immediate insight into real-time events.

→ **Future-proof and flexible:** The alarm portal is compatible with most modern alarm systems and transmitters. It is built to adapt to your future needs and can scale as your business grows.

→ **Cloud-based accessibility:** Access your alarm system from anywhere, at any time, and from any device. With secure login comparable to online banking, your data is protected and only accessible by authorized users.

→ **Documentation and service history:** Store all relevant documentation – from system certificates to user manuals – directly in the portal. Our service log allows technicians to record all service visits and maintenance, simplifying planning and follow-up.

Benefits for installers and technicians

LAMPORT Alarm Portal is designed with simplicity and flexibility in mind to make work easier for installers and technicians. By offering an intuitive interface for adding new users and adjusting alarm settings, installers can quickly get the system up and running, ensuring maximum operational reliability for their customers.

We provide security – now and in the future

At Lamport Sweden AB, we offer more than just technology – we offer security. Our solutions in security monitoring, installation, and service meet strict certification requirements and are designed to protect people, properties, and infrastructure in an efficient and sustainable way. With our LAMPORT Alarm Portal, we take the next step towards a more integrated and secure future.
